

SONAM DORJI

Thimphu, Bhutan | sonamd5dorji@gmail.com | www.linkedin.com/in/sonamygdorji | yamnang.vercel.app

PROFILE

Full-stack developer and fresh Computer Science graduate from GCIT with hands-on experience building and deploying web and mobile applications for real clients across Bhutan. Experienced in end-to-end development from UI design to backend APIs.

WORK EXPERIENCE

Druk Happy Cleaning Service

May 2026

Freelance Web Developer

- Designed and developed a responsive frontend for a local cleaning service company using Next.js, delivering a complete user-facing interface
- Status: Live at **drukhappycleaning.com**

Bhutan Stone & Aggregate Factory (BSAF)

Jan 2026 - Feb 2026

Freelance Full Stack Developer

- Revamped the entire legacy sales management system from the ground up, building both frontend and backend using HTML, CSS, JavaScript, and PHP REST APIs.
- Developed comprehensive modules including sales entry tracking, customer registration, product inventory management, and role-based account permissions for multi-user access control.
- Implemented multiple report generation features and an analytical dashboard providing real-time business insights for management.
- Built a receipt/challan generation system integrated directly into the sales workflow.
- Status: Live internal system at **sep.bsafbhutan.com**, restricted access, role-based login required.

Namzoed

Aug 2025 - Present

Co-founder & Lead App Developer

- Co-founded and led development of Namzoed, a super app for Bhutan built with React Native and TypeScript, live on both Google Play Store and Apple App Store. Available at **namzoed.com**
- Architected and developed core features including social feeds, category browsing, product and service listings, and full Facebook-style profile viewing
- Implemented real-time chat and messaging system integrated into the marketplace experience
- Managed backend infrastructure using Supabase for authentication, real-time data, and user management.
- Status: Live on both Play Store and App Store, webpage at **namzoed.com** with download links

GovTech Agency

July 2025 - Aug 2025

Development Service Intern

- Led complete setup and deployment of Dolibarr ERP system including configuration, module integration, and user onboarding for government operations.
- Developed a custom module for Dolibarr ERP tailored to organizational requirements.
- Produced an SDLC report covering software development lifecycle practices in the Bhutanese government context.

FastRateTravel

Oct 2024

Freelance Web Developer

- Designed and developed a complete frontend for a travel and tourism company using Next.js, covering all user-facing pages including tour packages, services, and contact sections.
- Status: Live but redesigned by client, original design no longer active.

Lhojong Insurance

Aug 2024

Freelance Web Developer

- Designed and developed a complete frontend for an insurance company using Next.js, covering all user-facing pages including service listings, company information, and contact sections.
- Status: Live at lhojong.com

Deya Bhutan Tours

Jul 2024

Freelance Web Developer

- Designed and developed a complete frontend for a Bhutanese tour company using Next.js, covering tour packages, itineraries, and booking inquiry sections
- Status: Live but redesigned by client

Digihubtechnologies

Mar 2024

Freelance Web Developer

- Designed and developed a complete frontend for a tech company using Next.js, covering all user-facing pages and sections.
- Status: Live but redesigned

MacStore Bhutan

Sept 2023

Freelance Web Developer

- Designed and developed the frontend for a Apple products retailer, initially built on WordPress then migrated to Next.js, covering product listings, store information, and service pages.
- Live at macstorebt.com

PROJECT

Marpa App - Parental Control Module

May 2026

- Developed a content filtering module as part of the Marpa app, a private React Native application, implementing parental control features to restrict and manage content access for child profiles.
